a rose is a rose is a book mary newson (usa)

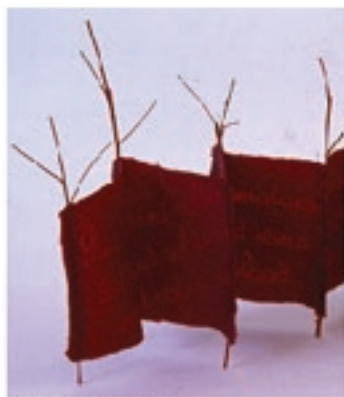

What is an artist's book?

It is an object in a form that challenges the viewer to step outside their prior book perceptions and interact at a new level. The materials used to construct the presentation format, the ideas and concepts presented will challenge one's notion of book.

An artist's book appeals to the senses as well as the intellect. We hold it, feel it, see it smell it, and absorb its contents. It may stimulate, inform, narrate, communicate, shock, irritate, amuse.

All of the above and more.
